

PEPperMAP® Epitope Mapping Solutions

- **Identification** and **mapping** of epitopes
- **Maximum** epitope **resolution**
- Unlimited peptide content **flexibility**
- **Linear** and **conformational** epitope mappings
- **Rapid** and **cost-effective**

PEPperMAP® Epitope Mappings

PEPperPRINT Peptide Microarrays are produced by a *unique laser-printing on-chip technology*, ensuring *high spot-density* and *best quality* for your research.

Special offers

- PEPperMAP® High Resolution Epitope Mapping with maximum peptide-peptide overlap
- PEPperMAP® Epitope Substitution Scans to analyze the fingerprint analysis antibody epitopes, including specificity evaluation.
- PEPperMAP® Antigen & Epitope Discovery to identify unknown epitopes and antigens.
- PEPperMAP® Cross-Reactivity Analysis of Antibodies for large-scale analysis of antibody cross-reactivity including a specificity evaluation

Benefits

- **Quality** – high reproducibility, highest signal-to-noise ratios, high specificity
- **Service** – excellent technical and scientific support
- **Flexibility** – layouts according to your specifications, content on demand at any time
- **Intuitiveness** – easy handling and analysis
- **Economics** – most cost-effective, no excessive and expensive peptide pre-synthesis
