

PEPperPRINT is a young and innovative biotech company located in Heidelberg, Germany. The company developed and uses a laser printing technology that enables the generation of high density peptide microarrays for biomedical research, drug and serum biomarker discovery. The global customer base includes top biotech and pharma companies as well as numerous research institutes, universities and biotech companies.

In order to strengthen our visibility and customer relations we are looking for a new team member (m/f) as:

Student Assistant / Intern for Business Development

You will have the opportunity to provide **your scientific knowledge and communication skills** to increase our visibility and develop new customer relations in life science business. Furthermore, together with our business development team you will **conduct market analyses** and support our customer **project management**.

The position is available from February 15th in Heidelberg-Wieblingen with a flexible working hour scheme (50-100 hours / month). **The position is now open for applications.**

Requirements & tasks:

- B.Sc. or M.Sc. degree in life sciences or related field
- Interest in business development
- Experience in dealing with social media (e.g. LinkedIn)
- Ability to communicate scientific data clearly
- Excellent verbal and written English and German skills
- Creativity and customer-oriented working methods
- Ability to work independently and structured
- Professional handling of MS Office tools
- Team player

Opportunity:

- Excellent development opportunities in a dynamic growing biotech company
- Opportunity to provide your direct input
- Possibility to work independently and to obtain responsibility
- Excellent support and regular feedback by our business development team
- Working in a highly motivated, multidisciplinary and collegial team
