

PEPperPRINT is a young and innovative biotech company located in Heidelberg, Germany. The company developed and uses a laser printing technology that enables the generation of high density peptide microarrays for biomedical research, drug and serum biomarker discovery. The global customer base includes top biotech and pharma companies as well as numerous research institutes, universities and biotech companies.

In order to strengthen our service team we are looking for a new team member (m/f) as:

Student Assistant / Intern for Immunoassays & Analysis

You will have the opportunity to learn chip-based immunoassays, data analysis using specific software tools and corresponding documentation.

The duration of this position is **6 to 9 months** in Heidelberg-Wieblingen with a **flexible working hour scheme (40-60 hours / month)**. **The position is now open for applications.**

Requirements & tasks:

- B.Sc. or M.Sc. degree in life sciences or related field
- Interest in lab work & data analysis
- Experience in immunoassays preferred
- Excellent verbal and written English and German skills
- Ability to work independently and structured
- Professional handling of MS Office tools and Adobe Photoshop
- Team player

Opportunity:

- Excellent development opportunities in a dynamic growing biotech company
- Opportunity to provide your direct input
- Possibility to work independently and to obtain responsibility
- Excellent support and regular feedback by our service team
- Working in a highly motivated, multidisciplinary and collegial team

Please send your application by email to **Dr. Eric Dyrzcz, Services**
