

PEPperMAP[®] Service Process

Curious about how the PEPperMAP[®] Service process looks like? Here is the answer!

Quote Request

Just send us a quote request along with your antigen/peptide sequences.

STEP
01

Based on your request, we provide you a quote within 48 hours.

We send an order confirmation along with a microarray layout for approval.

STEP
02

Purchase Order

If you agree with the quote, please send us a purchase order.

Microarray Production

After confirmation of the microarray layout, we initiate peptide microarray production. This process takes about 4 weeks.

STEP
03

Meanwhile, you send samples with all requested sample information to us.

To pass the quality control, the peptide microarrays have to exhibit a very low batch-to-batch variation.

STEP
04

Quality Control

When the array production is completed, we perform a routine quality control. This process usually takes 2 days.

Lab & Computer Work

After the quality control, we start the immunoassays in our lab. This process takes about 1-2 weeks.

STEP
05

After completion of the assays, we perform scientific data evaluation and reporting. This process takes about 1-2 weeks.

STEP
06

Delivery

Done! The report is sent to you. We are available for further questions and support.
