

PEPperCHIP[®] Peptide Microarray Production Process

Curious about how the PEPperCHIP[®] Peptide Microarray production process looks like? Here is the answer!

Quote Request

Just send us a quote request along with your antigen/peptide sequences.

STEP
01

Based on your request, we provide you a quote within 48 hours.

We send an order confirmation along with a microarray layout for approval.

STEP
02

Purchase Order

If you agree with the quote, please send us a purchase order.

Microarray Production

After confirmation of the microarray layout, we initiate peptide microarray production.

STEP
03

This process often takes about 4 weeks.

This process usually takes 2 days. To pass the quality control, the peptide microarrays have to exhibit a very low batch-to-batch variation.

STEP
04

Quality Control

When the array production is completed, we perform a routine quality control.

Delivery

Done! The peptide microarrays including all accessories are sent to you. We are available for further questions and support.
